Brief Introduction

XY-PG280F is a high Precision Digital Pressure Gauge, which was built-in high accuracy pressure sensor, sampling frequency can be maximum 50 times/second, it displays real time pressure at short response time, the typical characteristics are high accuracy and excellent long-term stability.

The digital pressure gauge has LCD display with 4 digits numbers. There are 4 buttons on front panel to control zero clearing, backlit display, Power On/Off, Unit converting, low voltage alarm and record Maximum and Minimum pressure data. It is easy to install in pipeline, Isolation tank or others connects device, easy to set up operating parameter. Working condition is -5~40 °C, it should be cold once working condition temperature more than 60°C, -20~150°C are customized.

It has 304 stainless steel shell and joint, can be used in measuring gas, liquid, oil and others medium without corrosion for stainless steel, at the same time its shock resistance is very good, especially for recording pressure measurement peak value of tire pressure, oil pressure and spray machine.

XY-PG280F digital pressure gauge is powered by 2 batteries (AA), with low power consumption and long duration.

There are three pressure measurement types: Gauge Pressure, Vacuum Pressure and Absolute Pressure machinal joint include Thread, Flush Diaphragm, Clamp, Flange, Radiator and Differential Two-way Fitting.
