Digital Pressure Switch XY-PS928E

Typical Feature

Stainless steel 304 shell, dial diameter Φ100mm

☐ 4-Digits LED Display,

☐ Multi-unit convert MPa/Kgf/cm²/PSI or Customized

☐ Accuracy level:0.5%FS

☐ Power supply 24VDC; Optional 220VAC

☐ Dual relay, output signal NONC

☐ High precision, quick response time, stable and easy setting up

Brief Introduction

XY-PS928E is an Intelligent Digital Pressure Switch, with 100mm diameter stainless steel shell, integrating pressure measurement, display and control function. It has a variety of excellent functions, such as one-button reset, Multi-pressure Unit Converting and it's easy to reset setting, adjusting and installation.

Two relays are built in, this series of digital pressure switches have dual relays, which can be set up two ways of normally open and normally close alarm points separately, also are able to control two ways of high and low pressure of air or liquid, in addition, it is with one key reset, at the same time, calibration, shifting display unit, setting return difference and others option functions.

The intelligent pressure switch is equipped with high-precision instrument amplifier to amplify pressure signal, built-in temperature compensation sensor, is the high precision equipment for detecting and monitoring pressure, strong anti-electromagnetic interference (EMI), surge protection, reverse protection and so on

XY-PS928E Intelligent Digital Pressure Switch can be widely used in Automatic System, Mobile Working Machines, Medical Equipment, Pump, Compressor, Energy and Water Treatment, Agricultural Equipment, Test System, Hydraulic System and Pneumatic System.

Suggested Applications

- Equipment Automation
- Mobile Work Machine
- 🖶 Water Pump and Air compressor
- 🖶 🛮 Electromechanical Equipment Automation
- 🖶 🛮 Energy and Water Treatment System
- 🖶 Medical Equipment
- Hydraulic and Pneumatic Systems
- 🖶 🛮 Agricultural Equipment
- 4 Test Jig
- Customized Applications

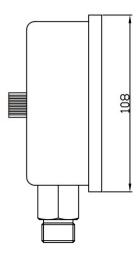

More details for XY-PS928E, please contact us.

Specification

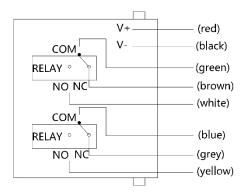

Model	XY-PG928E						
Gauge Pressure Range	0~0.2···1.0···1.6···5···10···25···40···60···100···160MPa						
Mirco Pressure Range	0···5···10···25···40···60···100KPa						
Vacuum Pressure Range	-100~0KPa						
Overload Capacity	200% (≤10MPa); 150%(>10MPa)						
Measurement Medium	Gas or oil or other Liquid with Compatibility of SS 304 or 316						
Accuracy Level	0.5%FS;						
Long-Term Stability/Year	Typical:±0.5% FS;						
Alarm Point	Any pressure @whole measurement range						
Output	Relay; NONC						
Load Capacity	220VAC 3A						
Display	4 digits LED						
Operating temperature	-20~80°C						
Compensation	-10~70°C						
Power Supply	24VDC ;220VAC; 380VAC are optional						
Electrical Protection	Anti-EMI; Reverse connection protection (Current Power Supply)						
Sampling Frequency	3 times/Second						
Standard Mechanical Joint	M20*1.5; NPT1/4, G1/4, Customized types						
Electronic Connection	Circular Connector						

Dimension(mm)

Output

Function	Connection Method					
	Low Alarm Point:Brown					
Alternative Contact Pressure Gauge	High Alarm Point:Yellow					
	Common Port:Green and Blue connect in parallel					
Low Pressure Close, High Pressure Open	Output: Brown+Green					
Low Pressure Close, High Pressure Open	Set AL and Hystersis Ad1					
Law Bassana On an High Bassana Class	Output: Yellow+Blue					
Low Pressure Open, High Pressure Close	Set AHand Hystersis Ad2					
Double High Pressure Alarm	A Way: White+Green(Set AL)					
(High Pressure Close)	B Way:(Blue+Yellow(Set AH)
